**Period for Reply**

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136 (a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133).
- Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

## **DETAILED ACTION**

### ***Election/Restrictions***

1. Applicant's election of Group I, claims 1-11, in Paper No. 6 is acknowledged. Because applicant did not distinctly and specifically point out the supposed errors in the restriction requirement, the election has been treated as an election without traverse (MPEP § 818.03(a)).

Upon further review of the claims, it has been noted that claim 12 was inadvertently included with Group II and not group I. Accordingly, claim 12 has been rejoined with that of Group I.

### ***Specification***

2. A substitute specification, including the claims is required pursuant to 37 CFR 1.125(a) because the top margin of the pages was insufficiently deep so to permit the insertion of retention tabs. Accordingly, portions of the first line of text and been obliterated.

A substitute specification filed under 37 CFR 1.125(a) must only contain subject matter from the original specification and any previously entered amendment under 37 CFR 1.121. If the substitute specification contains additional subject matter not of record, the substitute specification must be filed under 37 CFR 1.125(b) and must be accompanied by: 1) a statement that the substitute specification contains no new matter; and 2) a marked-up copy showing the amendments to be made via the substitute specification relative to the specification at the time the substitute specification is filed.

***Claim Rejections - 35 USC § 112***

3. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

4. Claims 1-12 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

5. Claim 1 is indefinite with respect to what constitutes a “thermal transfer membrane.”

6. Claims 2-12, which depend from claim 1, fail to overcome this issue and are similarly indefinite.

***Claim Rejections - 35 USC § 102***

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

7. Claims 1-12 are rejected under 35 U.S.C. 102(b) as being anticipated by Wilding et al. (US Patent 5,726,026).

Wilding et al., discloses a variety of devices that can be used in conjunction with biochemical assays, including a nucleic acid amplification reaction that requires thermocycling. As seen at column 8, the device can be fashioned out of a variety of suitable substrate materials, including silicon. The device can also comprise heating and cooling means (columns 12-13). The device can also include means that would generate a force so as to move the sample along a path or fluid communicating means (columns 5 and 16-17). The device can comprise an inlet as well as an outlet (column 12) as well as an opening for reagents (column 18). Figures 8A, 9, 9C,

Art Unit: 1655

and 10A depict devices that comprise a plurality of such pathways as well as a plurality of pathways that are arranged in parallel.

### *Conclusion*

8. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.

a. Zanzucchi et al., US Patent 5,858,804.

b. Parce et al., US Patent 6,046,056.
